A global march for change

GETTING YOUR VOICE HEARD

The Covid-19 pandemic has left millions of families without health care, income, schooling or enough food to eat. And a shadow pandemic of violence against women and people of colour is raging unchecked.

By joining our round-the-world journey, you can show world leaders that people everywhere want a more equal, healthy and safe future for all of us - not just for a few.

A better and more equal world is only possible if we join hands in pursuing the following demands and making sure that world leaders take notice!

- **Cancel the debt** that the rich world is claiming from the poorest countries.
- **Make big corporations pay their fair share of tax** to fund education, health care and social safety nets for all.
- **Defund big polluters and invest in green alternatives** so industries that fuel climate change and displace people don't get Covid-19 bailouts.
- **Fight violence against women** which has soared during Covid-19, whilst women's shelters and other vital support services are starved of funds.
